Project Executable Files

Date	30 September 2026
Team ID	SWTID-2026-3818
Project Name	Auto_Ticket_Classification_Using_Flow_Diagram
Maximum Marks	3 Marks

This section requires submission of all executable and deployable files. All files must be organised, named and uploaded so the evaluator can run the solution using the files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)	File / Link
1	Complete source code (all files and folders)	[Update]	GitHub / zip
2	README / Setup Guide (instructions to run the project)	[Update]	README.md
3	requirements.txt / dependency file	[Update]	requirements.txt
4	Database schema / seed files (SQLite schema, sample data)	[Update]	schema.sql
5	Environment configuration file (.env.example)	[Update]	.env.example
6	Deployed application URL (if hosted)	[Update]	[URL]
7	APK / Executable binary (if applicable)	NA	Web app
8	Dockerfile / Containerization config (optional)	[Update]	Dockerfile
9	Test files and test results	[Update]	tests/
10	Trained model files (model.pkl, vectorizer.pkl) and dataset sample	[Update]	models/, data/
11	Demo video or walkthrough	[Update]	[Link]

Step 2: How to Run

- Install Python 3.10+ and Graphviz.
- pip install -r requirements.txt
- python src/train_model.py (creates the model files)
- python app.py and open http://127.0.0.1:5000
